

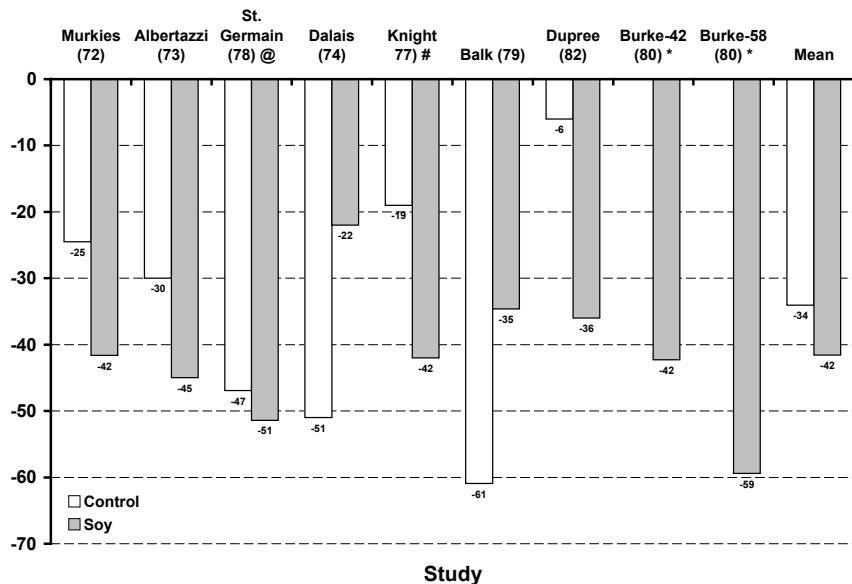

Figure 2

## Percent Change in Hot Flashes Reported in Studies of Soy Products

@ = Data shown were estimated from figures in the manuscripts.

# = Data reported in Krebs et al. (70), which were estimates from figures in the original manuscripts, were used.

\* = Study did not include a nonsoy control group. All data represented were reported as hot flash rate except Balk et al., (78, hot flash severity score), Dupree et al., (81, vasomotor symptom score), and Burke et al., (79, vasomotor symptom rate).
